

Podiatry Practice and Educator

Orthofit was founded in 1998. After meeting world renowned podiatrist Phillip Vasyli, I trained under his mentorship and certification. This inspired the start of our podiatry practice, specializing in Foot, Ankle & Lower Limb Assessment and Care.

Our Protocol we follow a complete care approach Assessment, Diagnosis and Treatment. This includes customized orthotic insoles and therapeutic footwear, functional strength training, physical therapy, pain management and specialized medical and diabetic foot care.

Our Commitment at Orthofit, we bridge the gap between foot health and overall physical health. By understanding foot and ankle conditions, biomechanics and how alignment, gait, posture, and surfaces impact the body, we support your health at every stage of life.

We look forward to share our knowledge with the participating practitioners.

Chaitanya Shah

Chief Podiatrist & Founder

The Professional Roadmap

Learn & Get Certified Through

SEMINAR | FOUNDATION COURSE | ADVANCE COURSE

Vision : Empowering Physical Healthcare Practitioners to Optimize Care, Outcome and Practice Success.

Mission : Bridge the gap between physical healthcare practices and specialized podiatric care.

WHY THIS PODIATRY PRACTICE MATTERS

Podiatry is closely related to Science and Engineering, widely practiced in the western world, while it is nascent in India.

75% of the global population experience serious foot, ankle and lower limb pain and deformities during their life span.

- ✓ Painkillers and temporary fixes don't work anymore.
- ✓ Symptom-based care falls short, no longer enough.
- ✓ Foot mal-alignment problems, don't just stay in the feet, they travel up the kinetic chain.

Foot dysfunction impacts the entire kinetic chain from ground up to low back.

Podiatry Practice empowers clinicians to treat the root cause of the pain, not just the symptoms.

Core Biomechanical Concepts to be Explored

1. Foundation : Foot & Ankle Anatomy.
2. Ideal Biomechanics.
3. The Gait Cycle Masterclass.
4. A Tri-Planar Motion Control.
5. Subtalar Joint.
6. Forefoot & Rearfoot Mechanics.
7. Faulty Biomechanics.
8. Biomechanical Complaints.
9. Introduction Dr. Edge Orthotics : Customize insoles, footwear, footcare products and accessories.

WHO SHOULD ATTEND?

- ✓ Physiotherapists & Rehabilitation Practitioners.
- ✓ Sports Coaches & Performance Trainers.
- ✓ General Healthcare Practitioners.
- ✓ Diabetologists & Orthopaedics.
- ✓ Pain Management Specialists.
- ✓ Aspiring Healthcare Students.

PROFESSIONAL TAKEAWAYS

- ✓ **Join Orthofit & Aureva Synergy driven Podiatric Community** : Gain access to ongoing Marketing & Branding Support to grow your future practice.
- ✓ **Professional Certification** : Get detailed guidance on becoming a Certified Podiatry Practitioner and establish credibility in specialized foot care.
- ✓ **Clinical Differentiation** : Stand out in your community by incorporating Podiatry in your clinical practice.
- ✓ **Better Patient Outcomes** : Learn to resolve chronic issues "From Toe to Head" by stabilizing the body's foundation and treating root causes.
- ✓ **Practice Growth** : Integrate Podiatry knowledge in your practice to boost
 - Optimise patient results.
 - Build your brand.
 - Increase patients inflow.
 - Enhance revenue in multi fold.

The Organiser

Aureva Synergy Consulting is a leader in healthcare consulting and specialize in bridging the gap between clinical excellence and expert execution.

Ensuring to build successful marketing support, revenue growth strategy and patient-centric practices for healthcare professional.
